

1040Works Conversions 2009

Welcome to 1040Works 2009

Thank you for choosing 1040Works Professional Tax Software. We are excited to have you on our team and we are look forward to building a lasting relationship together.

As you make the transition to 1040Works we want to ensure that everything runs as smoothly as possible. The first step of this transition will be converting your clients from ProSeries to 1040Works. This document contains step-by-step instructions on converting your clients. Please read through it carefully.

We have also included a section noting the specific fields for each form that is converted to each 1040Works system. The form information is lengthy and is intended for reference purposes only. You needn't read it in its entirety. Information is documented for systems 1040. The systems 1041, 1065, 1120, and 1120S are scheduled to be released approximately 11/01/10.

If you require assistance during the conversion process, please don't hesitate to contact our support team at 1-800-843-1139. Again, welcome! We look forward to working with you.

Sincerely,

1040Works Professional Tax Software

Disclaimer Statement

The goals of the 1040Works data conversion are as follows:

1. To convert only the ProSeries data to 1040Works format you will need to run Update Clients which transfers your 2009 1040Works data to 2010 1040Works.
2. To convert only the 2009 ProSeries data to 2009 1040Works format that will allow you to generate complete and accurate Tax Organizers.

The data conversion is NOT intended to do the following:

1. It is NOT intended to convert all of your data.
2. It is NOT intended to allow you to generate a complete and accurate 2009 1040Works tax return.

NOTE: Do not process/prepare 2009 tax returns using only the converted information, as tax calculations may not be accurate. Some manual data entry may be required.

Depreciation Conversions

- ✍ We recommend you print a copy of the TaxWorks Federal Depreciation Schedule and verify that the TaxWorks current depreciation amounts match those calculated by your prior software. Due to the many ways depreciation can be calculated, there may be slight differences that could require manual overrides in the TaxWorks Depreciation Worksheet.
- ✍ Verify the Method accurately converted.
- ✍ Verify the Convention accurately converted. Any default Conventions will convert. If there is not a default Convention the direct entry will convert.
- ✍ If you have overridden any depreciation calculations, review them for accuracy.
- ✍ If you had selected to delete the asset next year, the asset will not convert.
- ✍ Assets involved in a like-kind exchange may not convert properly, because of the difference in handling between the two systems. Review them carefully to make sure the correct information is entered into the TaxWorks Depreciation Worksheet.
- ✍ Due to the limited amount of information being converted, if you have current year Section 179, the conversion may calculate a carryforward of these amounts. To remove the unused carryforward, open the TaxWorks 2009 Depreciation Worksheet, and remove any unnecessary information.

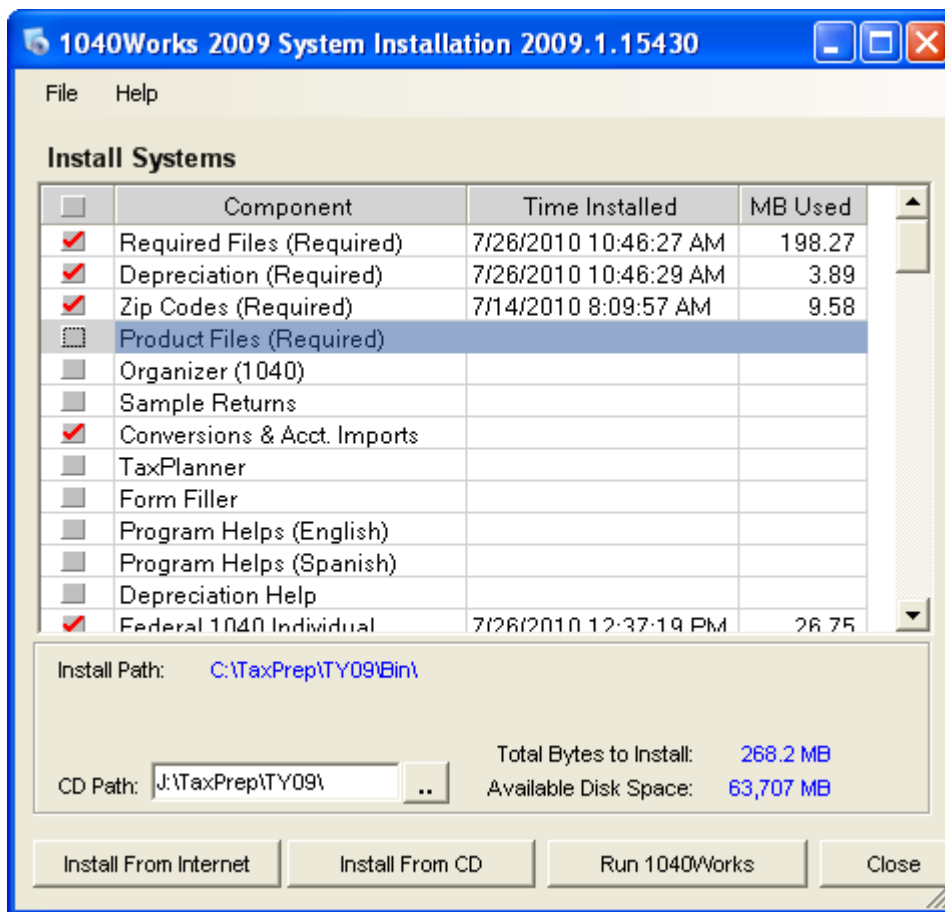

Individual Conversion

Note: *1040Works only converts information necessary to prepare a Proforma and Taxpayer Organizer.*

- ✍ Items selected for deletion for next year may not be taken into account. You may have to manually remove some items after updating to 1040Works 2009.
- ✍ Detail statements – All amounts and descriptions may not convert.
- ✍ 1040Works 2009 Taxpayer Organizer – Will be available August 2010.
